

# Je suis PROJET PROGRES

for startups and innovative SME's

WWW.PROJET-PROGRES.EU

**Room40** uses data, video, images and sound to improve security in the broadest sense. Our technology helps governments to improve the safety and security of its citizens, but can also be used in the private sector. Privacy and security interfere with each other. Room 40 can help you make this trade-off.

**Novastream** is editor of a video hosting site for businesses. Our video tool is used to centralize, qualify and broadcast video content in companies.  
[novastream.fr](http://novastream.fr)

**The Third** is specialized in real estate visualization. We create 3D productions and applications. We also make real time virtual visits with an app or online.  
[thethirdstudio.com](http://thethirdstudio.com)

**Pingflow** is an expert in digital and dynamic visual management. We develop simple and ergonomic software solutions for the digital transition of your visual management, activity monitoring and internal communication.

Flemish    Walloon    French

**Visiotalent** creates innovative solutions for recruitment procedures. We bring candidates to life through video applications.  
[visiotalent.com](http://visiotalent.com)

**WeGroup** offers a peer to peer property insurance platform. With this we enable our users to share risks with their peers, which transfers part of the responsibilities from the insurance company to the users. To accomplish this, we use a mix of cutting-edge tech for the purposes of transparency, fraud-detection and automation.

## PROGRES startup village

**Meet Square** is a platform or gateway for collaboration between companies, which allows different partners of a common project to exchange information and manage their projects in a simple, efficient and secure way. We offer a network where managers can easily connect instead of sending plenty of e-mails.  
[meet-2.com](http://meet-2.com)

## Tech startup day

15 March 2018  
Brussels

**Esomus** makes it possible to standardize, centralize and optimize a dynamic risk management by creating a standardized database and identify hazards. It will allow the prevention of work-related accidents in your company.  
[esomus.com](http://esomus.com)

**Wipple** makes working together work better. We digitize your meeting room with the best collaborative technologies.  
[wipple.fr](http://wipple.fr)

**Solar Enterprise** is generating, storing and using energy locally in a sustainable way. With a small windmill like Eolie we can convert wind into electricity that can provide enough energy for smaller users to keep working.  
[solarenterprise.eu](http://solarenterprise.eu)

**Urbik** proposes solutions that bring different types of digital services in public spaces in order to inform and connect people, to facilitate interactions, to give advice, to measure and produce data. Urbik focuses on three sectors: tourism, urban redevelopment projects and sports and cultural events.
